June 1, 1994

Reference: Lord-Shope RD/RA Monthly Progress Report

Dear Mr. Turner:

Lord is hereby submitting five copies of the monthly progress report for June, 1994.

The following work was conducted during this period:

REMEDIAL DESIGN/REMEDIAL ACTION

Lord has now submitted the completed Remedial Design (100%) which incorporates all of the recommended changes by USEPA and their consultants. Once approval has been received, Lord will commence with the RA process. Lord is proceeding with screening of prospective RA contractors as planned. Those contractors which are successful in the screening process will be provided with a bid package and requested to bid on the remedial installation.

MISCELLANEOUS:

The monthly inspection was performed and the site is in good condition.

As noted previously, once the RD has been officially approved by USEPA, the current Lord access agreement will terminate. No word has yet been received from Over Lake regarding our request for extension of the access agreement. Lord is still actively engaged in negotiations for a long term resolution of this matter. USEPA assistance to obtain access will be needed in order for Lord to proceed with the RA if this matter is not resolved by the time USEPA approves the RD.

Yours truly,

LORD CORPORATION

Eugene A. Miller
